

AMENDMENTS TO THE CLAIMS

Please amend the claims as follows.

1. (Currently Amended) A method of controlling access to resources, said method comprising:
 - storing a policy decision for a resource in local memory, said policy decision received from a remote source of policy definitions, said policy decision based on a policy definition governing access to said resource and on requestor identifying information provided to said remote source;
 - receiving a first request for access to said resource, said first request comprising said requestor identifying information;
 - evaluating said first request using said policy decision in said local memory;
 - receiving a notification from said remote source, said notification comprising an updated version of said policy decision that said policy decision in said local memory is affected by a change in said policy definition;
 - receiving a second request for access to said resource, said second request comprising said requestor identifying information; and
 - evaluating said second request based on said ~~notification~~ updated version of said policy decision.
2. (Previously Presented) The method of Claim 1 wherein said resource is affiliated with another resource, and wherein further a policy decision for said other resource is received from said remote source and stored in said local memory.
3. (Canceled)
4. (Currently Amended) The method of Claim 1 wherein said notification identifies resources affected by said ~~change~~ updated version of said policy decision.

5. (Currently Amended) The method of Claim 1, wherein
receiving said notification further comprises storing an said updated version of
said policy decision in said local memory; ~~wherein said notification~~
~~comprises said updated version of said policy decision, and wherein said~~
~~updated version of said policy decision is based on said change; and~~
~~evaluating said second request further comprises using said updated version of~~
~~said policy decision in said local memory.~~
6. (Canceled)
7. (Previously Presented) The method of Claim 1 further comprising:
sending a message to said remote source, said message requesting updates for
policy decisions stored in said local memory.
8. (Previously Presented) The method of Claim 1 wherein a period of time said policy
decision is valid is also received from said remote source and stored locally.
9. (Previously Presented) The method of Claim 1 wherein a condition associated with
said policy definition is also received from said remote source and stored locally,
wherein said condition is enforced locally.
10. (Currently Amended) A method of controlling access to resources, said method
comprising:
receiving a first request for access to a resource, said first request comprising
requestor identifying information, wherein said first request is referred to a
remote source of a policy definition that governs access to said resource for
evaluation;
receiving from said remote source a policy decision for said resource, said policy
decision based on said policy definition and said requestor identifying
information; and

storing said policy decision in local memory, wherein a second request for access to said resource is evaluated locally using said policy decision stored in said local memory; and

receiving a notification from said remote source, said notification comprising an updated version of that said policy decision ~~is affected by a change in said policy definition~~, wherein a third request for access to said resource is evaluated based on said ~~notification~~ updated version of said policy decision.

11. (Previously Presented) The method of Claim 10 wherein said resource is affiliated with another resource, wherein a policy decision for said other resource is received from said remote source and stored in said local memory.

12. (Canceled)

13. (Currently Amended) The method of Claim 10 wherein said notification identifies resources affected by said ~~ehange~~ updated version of said policy decision.

14. (Currently Amended) The method of Claim 10, wherein

receiving said notification further comprises storing an said updated version of said policy decision in said local memory, ~~wherein said third request is evaluated using said updated version of said policy decision, wherein said notification comprises said updated version of said policy decision and wherein said updated version of said policy decision is based on said ehange.~~

15. (Canceled)

16. (Previously Presented) The method of Claim 10 further comprising:

sending a message to said remote source, said message requesting updates to policy decisions stored in said local memory.

17. (Original) The method of Claim 10 further comprising:
receiving information that identifies a period of time said policy decision is valid.
18. (Previously Presented) The method of Claim 10 further comprising:
receiving from said remote source a condition associated with said policy definition, wherein said condition is enforced locally.
19. (Currently Amended) A computer-usable medium having computer-readable program code embodied therein for causing a computer system to perform a method of controlling access to resources, said method comprising:
storing in local memory a policy decision for a first resource, said policy decision received from a remote source of policy definitions, said policy decision based on a policy definition governing access to said first resource and on requestor identifying information provided to said source;
receiving a first request for access to said first resource, said request comprising said requestor identifying information;
evaluating said first request using said policy decision stored in said local memory;
receiving a notification from said remote source, said notification comprising an updated version of said policy decision ~~that said policy decision in said local memory is affected by a change in said policy definition~~;
receiving a second request for access to said first resource; and
evaluating said second request based on said ~~notification~~ updated version of said policy decision.
20. (Previously Presented) The computer-usable medium of Claim 19 wherein said first resource is affiliated with another resource, wherein a policy decision for said other resource is received from said remote source and stored in said local memory.
21. (Canceled)

22. (Previously Presented) The computer-usable medium of Claim 19 wherein said computer-readable program code embodied therein causes said computer system to perform said method further comprising:
- sending a message to said remote source, said message requesting updates for policy decisions stored in said local memory.
23. (Previously Presented) The computer-usable medium of Claim 19 wherein a period of time said policy decision is valid is also received from said remote source and stored locally.
24. (Previously Presented) The computer-usable medium of Claim 19 wherein a condition associated with said policy definition is also received from said remote source and stored locally, wherein said condition is enforced locally.
25. (Previously Presented) The computer-usable medium of Claim 19 wherein said computer-readable program code embodied therein causes said computer system to perform said method further comprising:
- receiving a first request for access to a second resource, said first request comprising said requestor identifying information;
 - providing said requestor identifying information to said remote source;
 - receiving from said remote source a policy decision for said second resource, said policy decision for said second resource based on a policy definition that governs access to said second resource and said requestor identifying information; and
 - storing said policy decision for said second resource in said local memory, wherein a second request for said second resource is evaluated using said policy decision stored in said local memory.
